COVID-19 Trends

We will be working diligently to get the latest statistics regarding COVID-19 patients. Below are this week's newest numbers, (the last reported sent out was on May 1 for reference).

We have had a total of 390 patients under investigation (PUIs)

258 patients tested **NEGATIVE** for COVID-19

127 patients tested **POSITIVE** for COVID-19
***27 were seen & discharged through the ED**

Of the 127 positive cases, **100** were admitted.

Out of the 100 admitted patients, 90 were discharged and 10 remain in-house.

As we take small steps to reopen our community, it is important to stay diligent in our practices within the workplace. Please continue to wear your facemask in all clinical areas and while traveling in hallways and cafeteria, please continue when possible to social distance and remain diligent with strict hand sanitizing and hand washing practices. We have managed this pandemic extremely well physically, logistically and emotionally. Please remember to find time to care for yourself, physically and emotionally. If you or someone you know is feeling overwhelmed with emotions please reach out to our EAP program for assistance **1-800-523-5668**.
